

**Notice of Study Commencement
County of Peterborough
Class Environmental Assessment
For the Reconstruction of County Road 30**

The County of Peterborough is undertaking a Municipal Class Environmental Assessment for the reconstruction of County Road 30 from Highway 7 to Old Norwood Road in Havelock. The need for reconstruction of County Road 30 is driven by the poor condition of the asphalt pavement, numerous drainage issues within the right of way, and the need to replace the existing watermain and portions of the sanitary sewer. In addition, County Road 30 currently has a semi-urban cross section with inconsistent sidewalks making it difficult to access the downtown from south of Highway 7.

The project is being initiated in accordance with the latest edition of the Municipal Class Environmental Assessment (EA) Manual. The Municipal Class EA applies to municipal infrastructure projects including roads, bridges, water and wastewater projects. This project is designated as a Schedule 'C' undertaking, under the Environmental Assessment Act.

Public and agency consultation is an important component of the Environmental Assessment process. Public and agency input are invited for incorporation into the planning and design of the project.

The proposed work includes the reconstruction of County Road 30 to provide an urban cross section with curb and gutter, sidewalks and storm sewers. The project will also include the replacement of watermain and some sanitary sewer currently owned by the Township of Havelock-Belmont-Methuen.

A Public Information Centre (PIC) will be scheduled in the future upon which time preliminary design options will be on-display for public review and comment. Subject to comments received and the receipt of necessary approvals, the County of Peterborough intends to proceed with the planning, design, and construction of this project.
