

The Corporation of the County of Peterborough

TRANSPORTATION PLAN UPDATE NOTICE OF STUDY COMMENCEMENT

The current **Transportation Plan** provides a comprehensive assessment of the **County's transportation improvement needs to the 2021 horizon** and provides recommendations for operational design and transportation policies that the County uses to manage its transportation infrastructure. One of the recommendations of the current Transportation Plan is that the County should complete a review and update of the plan every 5 years.

Many of the **short term recommendations** from the current transportation plan have been implemented, while many of the **longer term improvement recommendations** have yet to be initiated and will be subject to review as part of this plan update. During the last 5 years, the County and City have updated their growth forecasts to comply with the new **Provincial Growth Plan: Places to Grow**; there have been a number of **changes to legislated requirements**, and other ongoing transportation initiatives in the community; and there is continuing need to balance infrastructure needs with the financial resources of municipalities.

This is the **first update** of the existing **County of Peterborough Transportation Plan**, and the County is inviting the **public** and other **stakeholder groups to participate** in the study and to assist the team in updating the plan to address **changing trends, emerging needs, and new opportunities**. The **study** will be undertaken in accordance with the **Municipal Class Environmental Assessment Process**, and will include opportunities for the **public to attend information centres and submit comments** at specific points through the study (to be publicly advertised as appropriate). With the exception of personal information, all comments will become part of the public record for the project.

You are encouraged to forward any comments.....

Mr. Kevin Jones, C.E.T.
